Ophir Optronics' CO2 Optics Group Announces Full Line Of Reusable Lens Mounts For Amada CO2 Laser Equipment

Company's EZ-Mount™ enables operators to change a lens, without replacing the mount, on any Amada machine

Jerusalem, Israel, 13 July 2008 – Ophir Optronics Ltd., a global leader in precision IR optics components and laser measurement equipment, announced today that its CO2 Optics Group has enhanced its EZ-Mount product line to be fully compatible for all Amada CO2 laser machines.

Without any screws or small springs to contend with, EZ-Mount features a turn-to-open mechanism enabling quick, safe removal of lenses for on-the-spot cleaning, focal length adjustment or replacement. With EZ-Mount, an O-Ring replaces the potentially toxic indium wire used in traditional mounts. It is also more cost-effective than traditional mounts because it is completely reusable and saves time on lens maintenance.

"EZ-Mount is an off-the-shelf money-saver approved for Amada systems," remarked Yehiel Plaut, Sales and Marketing Manager for Ophir Optronics' CO2 Optics Group. "It eliminates the need for an inventory of expensive lenses and mounts and allows Amada users to purchase just the lenses they need, when they need them."

About Ophir Optronics / CO2 Optics Group

Established in 1976, Ophir Optronics is a global leader in precision IR optics components and laser measurement equipment.

Our CO2 Optics Group produces a full range of OEM and replacement optics including beam-delivery and cavity optics as well as windows. Ophir provides the highest quality CO2 optics at the best price. The second largest OEM supplier in the world, all manufacturing is done in-house using automated CNC technology assuring complete uniformity. Driven by innovation, we've produced a longer lasting lens with a radioactive-free coating, called Black Magic™, and an ultra-low absorption lens with a transparent coating, called Clear Magic™. Our commitment to the customer is second to none, with a global distribution and support network. This unwavering commitment to forward thinking helps keep us "a cut above the rest".
